

Technology and the Future of Industry

September 14, 2021 | 7:30 PM MT

Adam Duval, B.Sc., P.Chem.
Technical Service Representative
Brenntag Canada

Presentation Abstract

Artificial intelligence, machine learning, data science and other tech buzzwords are becoming ubiquitous in our work and personal lives. An overview of current technology trends, how they are being applied to industry and how they might shape the future of work.

Speaker Bio

Adam Duval grew up in New Brunswick. After receiving his Bachelor of Science degree with a major in chemistry from Dalhousie University in Halifax Nova Scotia he moved out west to start his career with Brenntag Canada. As a technical service representative for Brenntag, Adam works on establishing, troubleshooting, and optimizing technical chemical applications for major oil & gas and industrial accounts. Adam is a technology enthusiast whose work focuses on using technology and chemistry to provide robust internal corrosion inhibition programs for pipeline systems in Alberta and British Columbia.
